EXPERIENCE / PROJECTS

"Discord clone"

In this project I was able to use all the knowledge I don't have on the front-end to create a copy of Discord just by looking at the original.

Using: **ReactJS**, **Javascript**, **HTML**, **CSS**

- Link: [Click here!](#)
- Repositories: [Click here!](#)

"FullStack Registration"

User registration, which will be stored in the database where it can be edited and deleted, on the front-end and back-end.

Using: **NodeJS**, **MySQL**, **ExpressJS**, **ReactJS**, **Javascript**, **HTML**, **CSS**
